Web 2.0 and Social Networks:

What they mean for Not-for-Profit Organizations

"Web 2.0" applications bring new levels of interactivity to the web. They also bring new opportunities for organizations to promote their mission and goals as well as free and inexpensive resources for collaboration. Come learn where this can fit with your organization's technology, marketing, and budget.

PRESENTER: Randy Shannon, President, Web Strategies

Building a Data Warehouse and Business Intelligence (BI) Solution

In an ever-increasing regulated and complex operating environment organizations must recognize that business and clinical data is a vital asset. Organizations typically use numerous software packages to manage day-to-day functions but find it difficult to correlate disparate data sources to produce accurate, timely and actionable information. Business entities of all types are adapting Data Warehouse and Business Intelligence strategies to provide metrics that can create efficiencies, improve operations and drive business decisions that ultimately affect the bottom line.

PRESENTERS: Vivek Sawhney, CIO, Young Adult Institute
Ted Cole, Data Architect, Young Adult Institute

"Hot" Topics – Technology Roundtable

A roundtable discussion hosted by technology professionals who will shed light on hot topics for the field of technology. Topics range from Business Continuity, Agency Database Solutions, Social Networking, Cost Cutting Ideas, HIPPA and Remote Access. The list is a result of surveying organizations across the state to see what topics are of interest to their organization. Following the discussion, questions from attendees will be accepted and discussed in detail.

PRESENTERS: Michael Schultz, Information Technology Director
Herkimer ARC

Laurie Dale, Director of Information Technology
Ability Beyond Disability

Document Imaging – Is it a Lifesaver in a Sea of Paper?

Using document imaging software, your organization will be more efficient. Your staff will have faster access to documents. Organizational risk will be reduced and there will be ease in sharing documents throughout your organization. Attendees will hear about the scanning process and gain a general knowledge of how document management software works! Plus, hear how partnering with NYSID can make your document management system pay for itself.

PRESENTERS: Bob Goodman, NYSARC, Inc.
Chuck Tobin, Founding Partner, Focused Technologies

From Pen & Pencil ISPs to QWERTY Keyboards

The Individual Service Plan (ISP) required by OMRDD for individuals receiving waiver services is a necessary tool. It can be lengthy and time-consuming to complete BUT without it, services cannot be administered. Come learn how technology including electronic signatures can be a part of a MSC's life on the job.

PRESENTER: Justin M. Brockie, COO, Therap Services LLC

Beyond Compliance:

How Technology can help your Training Department reach its Goals, not just meet Regulatory Requirements.

Without question, Government's over site regulations play a major role in the life of Training Departments at every provider agency. Compliancy impacts everything you do from training, administration, to record keeping, to reporting. But training and employee development are about so much more than just meeting requirements. They are about striving for constantly improving quality of service. At times, the many tasks associated with compliance threaten to overshadow your efforts to be a positive influence in your Agency. This session will show you how management technology can streamline compliancy tasks so that meeting regulatory requirements can help you work to meet the goals of quality improvement.

PRESENTER: Tim Kisner, Gyrus

Going from a Paper-Based Service Model to a Software-Based Operation

Hear how one multi-service agency transitioned from an effective paper-based service agency to an efficient software-based operation with technological best practices. While some human service agency executives are afraid of software and others are quick to pass anything that says "technology" to the IT department, there is a community of nonprofit staff that are embracing the benefits that come with the digital age. Client tracking software can save hundreds of hours of paperwork, help improve audits from OMIG and other funders and streamline your agency's operations.

PRESENTERS: Ken Mack, Director MH Community Outreach,
Transitional Living Services of Onondaga Co.
Dave Kasdan, MS, CASAC, Foothold Technology

Like to do it Your Way, Try My Wave

My Wave is an online web center offering time-saving tools and resources that build convenience into everyday work tasks for Human Resource Departments, Training Departments, Compliance Officers and Program Directors. It offers tips and strategies on OSHA compliance, as well as, provides recordkeeping forms to assist with data collection and maintenance.
